

1. FULL N8N WORKFLOW CONNECTED TO WORDPRESS

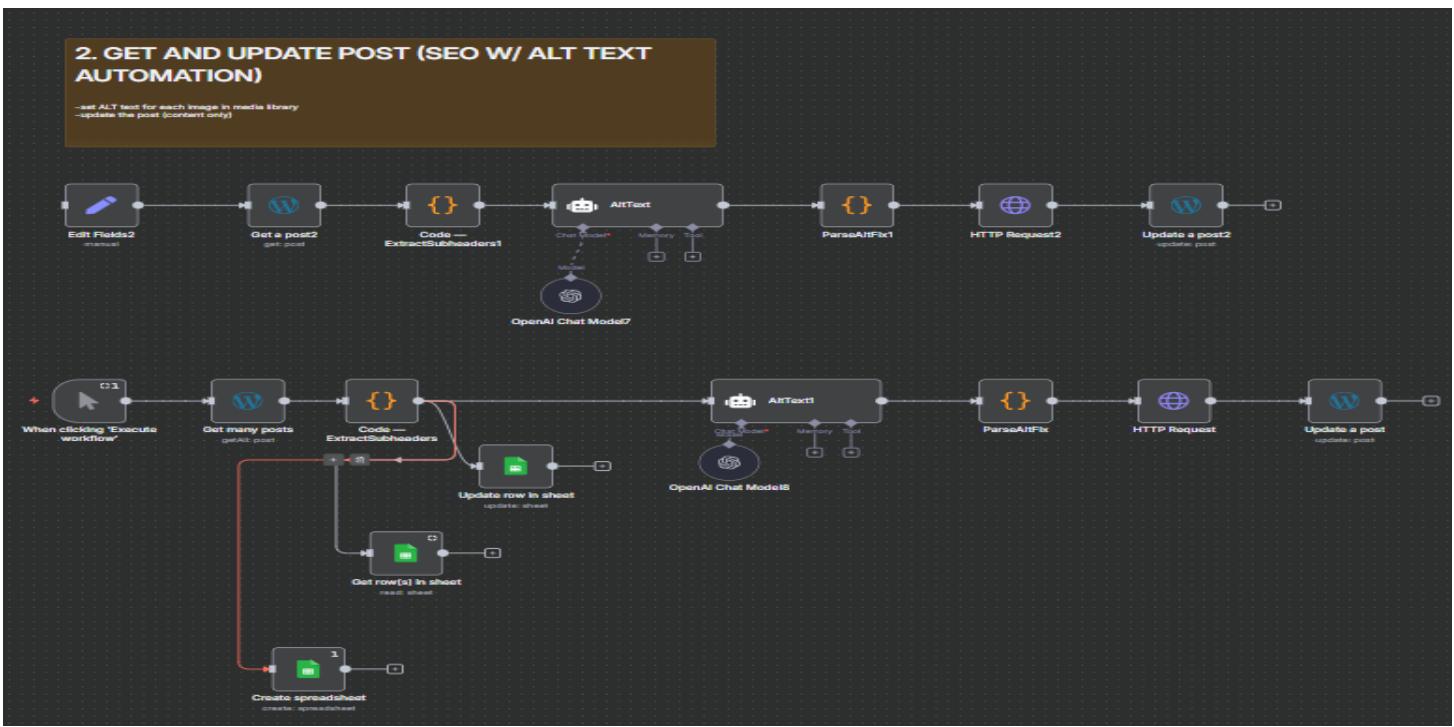

RESULTS: Connected to the wordpress site and can GET, CREATE, UPDATE POST with SEO HTML Automation through n8n workflow.

The screenshot shows the n8n canvas with the "Beginner's Home... (draft)" workflow. On the left, the "INPUT" tab displays the JSON configuration for the "Code in JavaScript" node, which contains the SEO HTML automation code. On the right, the "Preview" tab shows a live preview of the WordPress post titled "Beginner's Home Cleaning Tips" on the "Maggie Maid" website. The preview includes the post content, a sidebar with "Most Popular" posts, and a footer with copyright information.

But with a few simple tips, you can easily maintain a tidy and fresh living space without too much effort.</p><h2>Overview</h2><p>This guide will introduce you to some easy and effective cleaning habits that anyone can follow. Whether it's your bedroom, kitchen, or living room, these tips will help you get and stay organized.</p><h2>Main Content</h2><p>Consistency is key when it comes to cleaning. Make sure to clean daily, weekly, or monthly. For example, wipe kitchen counters daily and deep clean your bathroom weekly. Next, gather basic cleaning supplies like all-purpose cleaners, microfiber cloths, and a vacuum. Start with decluttering your space to make cleaning simpler. Always clean from top to bottom to avoid redoing any areas. Finally, make it fun by playing music while you clean or setting a timer to challenge yourself.</p><h2>Conclusion</h2><p>With these beginner-friendly tips, cleaning your home won't feel like a chore anymore. Consistency is key, and soon you'll find yourself enjoying a cleaner and more comfortable home environment.</p>"
}
  
```

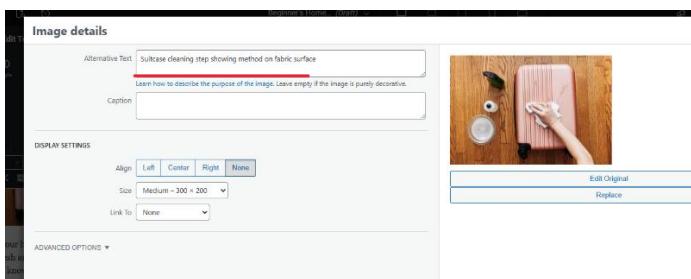

RESULTS: The Google Sheet acts as a “drafts dashboard” where each WordPress post becomes one row with its ID, title, slug, and full HTML content. The workflow fills the hasAnyImage, images, and missingAlt columns so you can see which posts have images and which specific image tags are missing alt attributes.

Once reviewed or updated, that sheet data is then used by the workflow to send cleaned-up image/alt information back to WordPress and update the posts.
